

## Time setting

The professional LEDI® clocks can display the same time information, synchronized by a master clock or a time server.  
On standalone and pulse version, the time setting is manual.  
Display date and time alternately.

## Internal time base

The LEDI® clock has its own temperature compensated TCXO time base which allows an accuracy about 0.1 sec / day between 0° to 40°C in case of synchronization loss.

## Security

Backup of time information in case of mains absence, by lithium battery: 10 years.
